

Attachment D Contractor / Government Communication Requirements

One of the Acquisition Objectives of SEWP is to promote and utilize electronic based methods and practices. While commonly placed under the e-Commerce umbrella, SEWP recognizes the need to provide for a variety of electronic-based procedures some of which do not traditionally fall within the e-Commerce realm; e.g. Fax image files, e-mail text files, etc. There are also many legacy systems and unplanned occurrences which require a flexible system capable of handling both electronic and paper processes. Neither Industry nor Government has concurred on a single solution that is capable of covering all Industry and Government needs. It is, therefore, the Government's intention to work with Contractors and Government Agencies to accept and deliver information such as orders, status reports, contract refreshments, etc. in mutually agreed upon formats. This addenda, therefore, provides only a basic outline of the types of electronic reports, including required data, which must be accepted and/or provided by the Contractor to the SEWP PMO. Actual implementations of the reports will be finalized and tested prior to placement of the first delivery order after the signing of the Contract. Where encryption is indicated, the Contractor and SEWP PMO will mutually agree upon the methodology.

D.1. On-Line Quoting

When a Market Research Request (MRR) or Request for Quote (RFQ) is issued using the NASA SEWP on-line Quote Request system, the Contractor must respond either

- by sending the following files to the SEWP PMO via the Contract Holder Only Page (CHOP) website:

1) the Contractor-generated quote in an image file, MS Word or Excel document or a mutually agreed upon format.

2) a verification file listing the CLINs included in the quote either as a text file, MS Word or Excel document or a mutually agreed upon format.

- Or by sending a "No Bid" response.

The SEWP PMO will ensure all responses are immediately forwarded to the original MRR/RFQ requestor.

Note that the contractor may not send a quote directly to the requestor when the NASA on-line Quote Request tool has been utilized. All quotes must be routed through the SEWP PMO.

D.2. Ordering

As described below, all SEWP orders must be assigned a SEWP Order tracking number in order to be considered a valid order. All Delivery Orders regardless of order value and credit card orders over the micro-purchase limit must be sent, processed and assigned an Order tracking number prior to being processed by the contractor. If the SEWP COR has authorized the contractor to accept micro purchase credit card orders directly, then credit card orders under the micro purchase limit may be processed immediately upon receipt by the Contractor as described in Section D.2.2. Credit Card Order Processing.

D.3. CLIN Verification Reports

Prior to the assignment of an SCN and therefore prior to the contractor processing an order, Contractors are required to supply to the SEWP PMO a CLIN Verification file that matches the product and price information on the order and/or mod. The total of the items listed in the verification file must equal the total amount of the order.

For order mods/updates, a new verification file must be provided that includes all information associated with the original order and all subsequent mods to date.

To avoid delays, contractors can submit verification files at the time of a quote, even if the quote is provided outside the SEWP on-line Quote Request Tool.

If a contractor has not provided a verification file or the total in the verification file does not the order amount, the order will not be assigned an SCN and cannot be processed. Any resultant delay will count against the contractor's delivery performance.
